I. Novelty and Inventive Step

The present invention relates to a cucurbituril bonded polymer, a cucurbituril derivative-containing copolymer, a stationary phase and a column using the polymer or the copolymer, which are useful for separation and removal of substances.

D1 relates to novel inorganic absorbent composites consisting of an open-pore, solid, and inorganic matrix, comprising cucurbiturils which are chemically linked in the matrix. D2 relates to the composition, and methods of preparation and uses novel cucurbituril derivatives having various repeating units and cavities of various sizes. D3 relates to a dye removing agent comprising a cucurbituril precursor as an active ingredient which is a condensate of glycoluril and formaldehyde and substantially does not form a complete cyclic structure.

The subject matter of the present invention differs from the disclosure of D1-D3 mainly in a polymer in which a particle-type polymer with a reactive end-substituted group is linked to a cucurbituril derivative of Formula 1 by a covalent bond; and in a monolithic column obtained by a monomer with a substituted or unsubstituted alkenyl group of C3-C20 and allyloxycucurbituril of Formula 1.

It cannot be considered obvious to a person skilled in the art, with knowledge of the cited documents, to link polymer with a reactive end-substituted group and cucurbiturils by a covalent bond and a monolithic column obtained by using said polymer.

Therefore, claims 1-23 of the present invention are considered to meet the requirements of Article 33(2) and 33(3).

II. Industrial Applicability

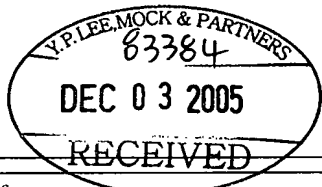

The subject matter of claims 1-23 is considered to be industrially applicable under PCT Article 33(4).

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits here with the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the *PCT Applicant's Guide*.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.
